AI-Lead

Enhancing SME competencies to leverage AI technologies

The project

The AI Lead project is an Erasmus+ Cooperation partnerships in vocational education and training (KA220-VET). The project aims at supporting SMEs in implementing AI tools in their daily practices, thus enhancing their efficiency and performances.

Objectives

01 To improve knowledge, skills and competencies of SMEs managers and workers on how to implement and leverage AI technologies in their daily practices.

02 To improve knowledge, skills and competencies of VET trainers as key actors to develop training initiatives on AI for SMEs.

03 To improve awareness of SMEs on the benefits of integrating AI tools in their daily practices.

Results

01 **AI Lead MOOC**

It is an online training course, designed for SME workers and managers, focusing on implementing AI tools to improve company efficiency, management, and business models.

02 **AI Lead Facilitator Kit**

It consists of a set of resources tailored for VET trainers and organisations interested in assisting SMEs with AI tool implementation.

03 **AI Lead Training Course**

It is a face-to-face training path for VET trainers aimed at providing them with both technical expertise and methodological skills necessary for developing training initiatives on AI for SMEs.
